What is a food processor?

A food processor is undoubtedly a functional appliance. It is designed to help you save time and effort by making complicated and manual tasks easier - such as kneading, grinding, chopping, blending, grating etc. It is your ultimate aide or partner in the kitchen. It makes possible a wide variety of dishes so you can add creativity to everyday menu's for your family.

Moulinex food processors make the complex simple and help you get creative with everyday meals.

Cooking can be both efficient and creative!

What is a kitchen machine?

A kitchen machine can make all your dessert dreams come true. Whether you're an experienced or an amateur cook, having a kitchen machine makes it easier to get the most specific results you need to make that perfect fondant or that moist chocolate cake! A kitchen machine is a more passion driven appliance designed to make desserts.

Moulinex kitchen machines help you do just that.
Convert your passion for baking into mouth-watering sweet treats...

Make gourmet desserts in your own kitchen!

How to select your chopper?

You spend your time in the kitchen cutting and chopping a bit of everything?

Daily use chopper

LA MOULINETTE XXL

You need a chopper for a specific purpose? Meat or Moloukhia

Dedicated choppers

LA MOULINETTE FORCE

MOULOUKHIA CHOPPER

You need a chopper that will not take a lot of space yet allows you flexibility?

Compact design and versatility

MULTI MOULINETTE

The Choppers that fit all your needs!

Moulinex
la moulinette force

Because meat needs a tough chopper

The Moulinette Force's Torque Force Technology works like a car's gear.
It generates greater power at a lower speed than the Moulinette XXL of Moulinex.
So its blades slowly but surely grind hard meat to a desired consistency. Unlike basic choppers that get slowed down and struggle to grind hard meat, the Moulinette Force can chop large quantities at a steady good pace.
